These tables represent the Top 10 positions within the AT Specimen Fish Award Scheme Competition since our formation in 2020.

# NATIONAL ADMINISTRATOR - ANNUAL REPORT

This year we see the introduction of three new Individual competitions, a combined Boat and Shore National Mini-Species League, and separate National Boat and Shore Specimen Fish Leagues. It is the Committee's aim to fully recognize members who register the most fish in these new events from 2026. Full entry details are published on our Competition Rules page 35.

Congratulations to our first Club Champion **CHARLIE CHAPMAN** from Poole who registered the best points total (420.70) in last years inaugural competition to establish himself as our clubs best all round angler. Charlie's ambition was to register five different specimen fish into the competition, and score 50 points or more for each of the 6 accepted species which he did. Very well done Charlie.

There were Individual titles for **STEVE KIRK** from Troon, **GEORGE GRAHAM** from Plymouth, and **PETE HEGG** from Portland. Our Regional Leagues continue to outline what this club is all about, most species fishing. We maintained our success in the Coronation Cup competition against Sea Section members with a 5th consecutive Inter Club victory (173 v 101), whilst serving members established a new club record points score for themselves. Funds were also raised by members to purchase annual shields for our Individual Champions.

The Angling Trust Affiliated Club Specimen Fish Award Scheme competition results are published after this Yearbook is issued, but 2024 saw us finish in 3rd place nationally with 117 certificates. We submitted 101 specimen and special award claims last year which normally see clubs finish in 5th place or above in this competition (see page 2). As soon as I have the Angling Trust results I will inform all members via a Newsletter.

42 of our 76 members submitted 450 Boat and 346 Shore main species claims last season which is 55% of the membership. To remain competitive nationally the Committee are hoping we will see more claims this year. Impressively, 6 new Boat, 1 Shore, and 3 Mini-Species Records were established with 46 Boat and 59 Shore PBs created by individual members. In that regard it was a good season despite some really poor weather periods throughout 2025.

We hosted our first National get-together competition last November in Anglesey, North Wales, which saw 11 members fish for the new Inter Region trophy donated by **PETE HEGG**, and won by our **NORTHERN REGION** members. Many congratulations to them, (full report on page 15). The event also raised funds for the club via a raffle which will keep us afloat for some years to come.

Please remember to submit Specimen, Record, and PB claims with a SELFIE photo of yourself, and one of your fish showing its weight on a set of scales. Only SELFIE pictures count for points in the Coronation Cup, with weighed fish replacing any unweighed claims. Advice on improving your photographs is noted on page 37.

Eight new members joined last year which is fantastic and the Committee hope we can get into the 80s this year, so please try your very best to recruit active veteran sea anglers. Our Membership Form is on page 40, or get them to contact me directly for an online copy and further information.

Trevor Sutch, National Administrator, RNRMAA Veterans SAC

## NORTHERN BOAT LEAGUE

- 1st - Steve Kirk - 29
- 2nd - Geoff Murphy - 22
- 3rd - Pete Dixon - 14

NEW MINI-SPECIE CLUB RECORD - 2025

BRITISH RECORD ON DATE OF CAPTURE

The Mini-Species Record Fish List is represented by the heaviest fish caught by a member from a Boat, or from the Shore. Unnamed species remain Vacant. There are no minimum size limits to register a New Club Record Mini-Species Fish. The governing body of our sport (The Angling Trust) do not yet separate Boat and Shore Mini-Species for record purposes.

2025 SPECIMEN FISH

NEW CLUB RECORD FISH ON DATE OF CAPTURE

Members are required to submit 5 main and 1 mini-specie SELFIE photographed and weighed fish during the year to be accepted into the Club Champions League competition. Those species are given points based on their percentage weight against the British Record Boat, Shore, and Mini-Specie fish list. The member with the most BR points is the winner.

# INTER REGION COMPETITION - ANGLESEY - 2025

Members requested more national meet-up events at the 2024 AGM and the club hosted the first of those on Friday 14th and Saturday 15th November 2025 at Holyhead Breakwater, Anglesey, North Wales. Permission from Stena Line Ports Ltd gained us vehicular access onto the Breakwater from 1000-2200 both days which was gratefully appreciated. Eleven members attended the event representing the Northern and Southern Regions. Accommodation was book at the excellent Holyhead Travelodge by all entrants. PETE HEGG donated a new Inter Region trophy for the competition.

Storm Claudia speeded across Wales overnight of the 14th which restricted our access to the better marks at the end of the Breakwater, heading towards the lighthouse for the Friday practice session. Nevertheless members did enjoy some very good action until 1500, when the waves started coming over the Breakwater onto those fishing, and our vehicles. A call to head to the pub at that point was gratefully accepted by all present. Up until that time everyone had caught fish represented by Ballan Wrasse, Bull Huss, Corkwing Wrasse, Dogfish, Pouting, Thornback Ray, and Whiting, at various distances from 10m to 100m plus. Two specimen Bull Huss were landed, the largest by TERRY DELL at 9lb 13ozs, 4.450kg @ 122.6% of the local area weight. PETE HEGG landed another specimen Bull Huss at 8lb 8ozs, 2.855kg @ 106.2%, both personal best fish for the anglers.

Our competition was held on the Saturday and fished up to the first corner of the Breakwater in better conditions, at least it wasn't raining, from 1030 until 1630 with high tide set at 0709 4.7m, and low water scheduled for 1300 at 2.0m. Again the venue fished very well throughout the day with Bass, Ballan Wrasse, Corkwing Wrasse, Dogfish, Goldsinney Wrasse, Poor Cod, Pouting, Short Spined Sea Scorpion, Thornback Ray (to 7lb 13ozs for GEOFF MURPHY), and Whiting registered on match cards. All members caught fish again but no specimens were landed.

A new points system was used for the first time whereby the first fish of each different specie gained 25 points, with a further 4 fish of each specie gaining another 5 points. Only 5 fish of each specie counted. The team with the most points won the competition. That honour for 2025 went to our NORTHERN REGION members by 725 v 555 over the Southern members team.

### NORTHERN REGION MEMBERS

1st	Geoff Murphy	210

**RNRMAA VETERANS SAC**

**173 v 101**

**RNAA SEA SECTION**

The Coronation Cup competition is fished between all RNRMAA Veteran SAC and RNAA Sea Section members annually. Members from each club may register 1 boat, 1 shore and 1 mini-specie fish as named on the British Record Fish List for points. 1 point is awarded for each claim, 2 for a New Club Record, 3 for a Specimen Fish and 4 for a New British Record. The highest points scoring fish will override any previous claim. Only SELFIE photo claims are allowed. The highest points scoring team wins.

NEW CLUB RECORD ON DATE OF CAPTURE

Our Fish Of The Month is defined by the highest percentage points specimen fish submitted by a member during a calendar month. If the specimen percentage is equal for two or more monthly fish, the award goes to the best percentage fish as noted against the British Record weight. Some months are missing due to no specimen fish being caught at that time. Printed Certificates and a FOTM sticker will be awarded to all named captors.

## ANGLING TRUST

### SPECIMEN FISH - AWARD SCHEME RULES

Updated 1st December 2025

- 1 ENTRY CONDITIONS.** The schemes are open to Members and Members of Affiliated Clubs, provided in both cases that at the time of the capture of the fish their current subscription or affiliation fees have been paid.
- 2 DURATION.** The schemes are an annual one. They open on the 1st December in each year and close on the 30th November the following year.
- 3 TWO SECTIONS.** The schemes are divided into two sections. Section B is for fish caught from boats and kayaks. Section S is for fish caught from the shore, piers, harbour walls or breakwaters.
- 4 SPECIMEN FISH.** The minimum size of specimen fish of each species in each section shall be decided, and may be varied, by the Angling Trust Competition Group Committee from time to time. Any variation made by the CGC shall be notified to each affiliated club individually and reasonable notice shall be given before it comes into effect. No fish below the minimum specimen size is eligible for this competition. The sizes at present in force are set out in the Schedule hereto and are in pounds and ounces (lbs and ozs), or kilograms (kgms).
- 5 LIMIT OF WATERS.** Only fish caught in the coastal waters of England (including the Channel Islands), Scotland, Wales and Ireland are eligible. [See also Rule 9 (iv)]. A boat angling trip is normally of one day or 24 hours duration, but if in the course of a trip, whether it be of one day or more, the boat puts into a port which is situated geographically in a different Specimen Area, then that port becomes the port of departure for the remainder of the fishing trip and the specimen weights of that port will be implemented. If for whatever reason the boat puts into a foreign port for which there are no Specimen Area Weights, then the Specimen Weights of the original port of departure will apply.
- 6 WEIGHING. To Qualify for the Principal Awards and Certificates of Merit:-**
  - a** All fish must be weighed on scales, steelyards or spring balances.
  - b** All weighing must be certified in writing by an official of a recognized Angling Club, and two witnesses, or one witness with photographic evidence, by either a digital camera, or mobile camera, as per the 'Catch and Release' method.
  - c** All weighing equipment must carry a current certificate of test.
  - d** Failure to comply with any of these requirements will render the registration null and void. Certificates of Test are obtainable from the Department of Weights and Measures. A copy of this certificate must be sent to the Hon. Fish Recorder with a club's or associations first registration made in any one year. All weighing equipment must be tested every 5 years and carry a current certificate of test.
  - e** There are certain species that have restrictions that require them to be weighed at sea, or measured. These are Bass, Monkfish, Undulate Ray, Silver Eel and Spurdog. Some of these species are on the critically endangered list within the Northeast Atlantic. There is a national restriction on landing Tope caught from a boat, which includes kayaks, and by rod and line. All boat caught Tope are legally required to be released as soon as possible after capture.
  - f** The situation with Bass is that the EU brought into existence a conservation measure that from the 1st January 2016, all Bass must be returned alive to the sea. To facilitate this measure, we have introduced a 'Measure and Release' rule for the scheme, for Bass. Each Area has a 'Specimen Length' for Bass caught either from the shore, or from a boat. From the length given for a fish, we can determine the weight by using the Scottish Sea Angling Conservation Network's 'Give Fish a Chance' online converter.
  - g** A Bass caught from the shore can also be weighed under the 'Catch and Release' scheme.
  - h** **However in the interests of conservation, the weight in lbs of the species Tope may be calculated using the following formula -  $Girth \times Girth \times Length$  divided by 800. All measurements should be taken in inches. The girth is measured at the widest part of the fish, and the length, for the purposes of these formulae only, from the tip of the nose to the fork in the tail. Tables of the formulae are available on request from the Angling Trust, as is a formula for calculating the weight of the Common Skate.**
  - i** Until such time as a suitable way of measuring sharks has been agreed, it has been decided to exclude these species from the list of weights. Once a reliable method has been agreed we will then re-enter them into the scheme.
  - j** **Weighing at Sea.** In addition, provided the Registration Form so indicates, fish weighed at sea will be accepted, but any certificates awarded will clearly indicate that the weight of the fish was estimated, and the fish returned alive to the sea.
  - k** **Catch and Release.** A weighing method whereby the fish caught from the shore, must be captured alive and weighed on tested digital/electronic scales, and the fish is released at the place of capture. For fish caught from a boat, the fish must be captured and weighed alive on the boat on the tested digital/electronic scales and the fish released at the place of weighing. In both cases, a photograph must be taken of the captor with the fish, and is to be made available, as necessary, to verify the capture/weight/species/release. The photograph can either be taken with a digital camera or a mobile phone camera.

# ANGLING TRUST

## SPECIMEN FISH - AWARD SCHEME RULES

- l** The testing of the members digital/electronic scales must be against their club's scales, and a record of the testing must be kept by the club. A label must be fixed to the member's scales showing the date they needed to be retested, a unique number for the scales, and who the scales belong to. These details must also be kept in the log kept by the club, together with the date when the scales were first tested. Any scales reading more than 0.5 ounces above the club scales will not be accepted. The member's scales must be tested every year.
- m** In the case of the 'Catch and Release' scheme, only one witness is required who was present at the time of capture and release of the fish.
- 7 REGISTRATION.** A Declaration in the form set out in the Schedule hereto must be filled in and signed by the captor and given by him to the Honorary Secretary of his club, and the latter will send the Declaration together with the Registration particulars in the form also set out in the Schedule duly completed, to the Manager of the Specimen Fish Award Scheme of the Angling Trust, or other Officer appointed for this purpose, within 30 days of the end of the month in which the fish was caught, except in the case of fish captured in NOVEMBER, when 14 days are allowed. Registrations should be sent direct to the Manager at the following address: 20 Chatsworth Road, Bitterne, Southampton. SO19 7NJ. Further proof of capture, identification and/or weight may be asked for, and in its absence the registration may be refused.
- a** The form may also be sent in electronically, in Excel format, which does not need to be signed. Any form sent electronically must be kept by the club or angler in case there is a requirement to see the completed form manually
- 8 FISHING RULES.** The following Angling Trust Marine Festival and Competition Rules No. 11 apply to this scheme and all entrants must abide by them:-
- Rule B2, 3 and S2 - ***as to tackle with the exception that not more than two rods with three single hooks or two pannel mounted baits between the two rods may be used. Only one pannel mounted bait is allowed on each rod and so constructed that the measurement between the eyes of the two hooks do not exceed 20cm for boat angling and 10cm for shore angling.***
- 9 AWARDS.**
- a** Awards are decided on a percentage system based on the amount by which a fish exceeds the minimum weight of a specimen fish in force at the time of its capture. The awards are in the form of Specimen Certificates, and are issued to the captors club at the end of each year.
- b** No individual shall receive more than one certificate for the same fish.
- c** In the case of every award and in such other cases as the Manager of the scheme shall decide, the claimant of a certificate or Special Award shall within 28 days of issue of a request for a statutory declaration send to the Manager of the scheme such a declaration in an approved form, stating that the capture of the fish in respect of which the award or Certificate is claimed was by fair angling methods and that the rules of the competition at the time were observed in all respects. The declaration is to be sent in addition to and not in substitution for the Specimen Fish Registration Form.
- d** The AT CGC may, at its discretion, award Bronze Certificates for any exceptional fish not included in the list of Specimen Fish. These will be termed 'Special Awards'.
- e** All captors of specimen fish accepted into the scheme have the option to purchase an appropriately engraved gilt, silvered, or bronze medal, to commemorate the capture.
- f** Regional Sizes. For the purpose of Registration, applicable regional sizes are determined by the point of departure for a claim made under Section B (Boats) and shore fishing stations or venue under Section S (Shore).
- 10 JUNIOR SPECIMEN AWARDS SCHEME.**
- a** All rules appertaining to the AT Senior Specimen Fish Award Scheme will apply to the AT Junior Award Scheme and participation is open to Juniors of affiliated clubs and Junior Sea Angling clubs affiliated to the AT in their own right.
- b** Juniors are defined as not having attained the age of 17 years as at the commencement of the current year's scheme, this commencement date being the 1st December of each year. A Junior who attains 16 years of age within the current year's scheme will be classed as a Junior for the purpose of further registrations to the end of that year's scheme which is the 30th November each year.
- c** The Juniors will have their own set of specimen weights, for each area.
- d** Any Junior can enter the Senior scheme if they wish, but the same fish cannot be entered into both schemes.
- 11 PRINCIPAL AWARDS.**
- a** The Sea Angling News Trophy is awarded to the affiliated club that registers the greatest number of specimen fish during the season.
- b** Glasgow Angling Centre ([www.fishingmegastore.co.uk](http://www.fishingmegastore.co.uk)) awards vouchers for 'specimen fish of the month' and 'best specimen fish of the year' across all sections.
- 12 ANGLING TRUST COMPETITION GROUP COMMITTEE.** All arrangements for the Specimen Fish Award Scheme are in the hands of the AT CGC, whose decision on any point shall be final and binding on all parties,
- 13 COPYRIGHT.** These rules, revised in July 2022, are the copyright of the Angling Trust and may not be reproduced whole or in part without its consent in writing.

LB-OZ-DM	K.GMS	% SCALE	LB-OZ-DM	K.GMS	% SCALE	LB-OZ-DM	K.GMS	% SCALE

To work out the specimen percentage scale of any fish caught in UK waters you can use this table. Follow this simple example and you won't go wrong. The UK Saltwater Shore Record weight for Smoothhound is 20lb 3ozs, 9.156kg. To work out the percentage (%) you must calculate how many drams are in the total weight of the fish. There are 16 ounces in 1 pound, 16 drams in 1 ounce. So 20 pound x 16 ounces = 320 ounces, plus the 3 ounces = 323. Then multiply 323 ounces x 16 drams = 5158 drams. You then multiply the total number of drams by the Specimen Area (%) scale noted above which is 10lb for the Hampshire caught Record Smoothhound for this example to reveal it's specimen percentage. 5168 drams x 0.0390625 = 201.87%

BRITISH RECORD ON DATE OF CAPTURE

BRFC UPDATE 28/11/25

The British Record Fish Committee (BRFC) introduced New Sea Fish Record lists by measurement instead of weight for sea fish caught from the boat or shore from 2025. The listings will record the length of the fish, with the exception of Rays and Skates in which case the listing will record the width of the fish from wing tip to wing tip. Members should refer to item 4 of the measuring protocol below. The Mini-Species list, which records species with record weights of less than one pound, is not affected by the announcement. The primary reason for the introduction of these new length records is to promote catch and release of sea fish. Boat caught records have always required the fish to be weighed on land which in most cases meant that the fish had to be killed in order to claim the record. The existing weight records for boat caught sea fish (as noted in the Yearbook) have been frozen, and the existing weight records will be kept on the list for historical purposes. The weight-based listing for shore caught sea fish will remain, with the exception of Bluefin Tuna, and the larger Shark species (Blue, Mako, Porbeagle, Six Gilled and Thresher) for which only one length record will be maintained for both Boat and Shore. So captors of potential record shore caught sea fish may make a claim for either the weight based or measurement based record, or both. The BRFC has set minimum length or width criteria for many species and a list of these can be found in the final column of these tables. The list will be updated from time to time on the AT website and the minimum criteria for a species may go up or down depending on the number of record claims received for that species. There will be an open period for initial claims until 31 May 2025. In June 2025 the BRFC will then meet to consider all length claims and award the initial length records to the largest authenticated claim for each species received by the committee. The BRFC would like to make it clear that where a species new to the UK is captured, it can be helpful for research purposes if such specimens are retained, frozen and sent to the BRFC fish identification expert at the National History Museum.

## PROTOCOL FOR MEASURING FISH FOR LENGTH-BASED RECORDS

- The entire measuring process must be filmed clearly using a mobile phone or other digital device. The film needs to provide clear evidence of how the fish was measured and the length/width obtained.
- The length should be measured by placing the fish on a measure (ideally damp and made of a soft material or plastic). The fish should also be filmed with the tape measure lying on top of it or next to it to avoid any suggestion of the tape having been folded when under the fish during measuring.
- For Bluefin Tuna, and the larger shark species (Blue, Mako, Porbeagle, Six Gilled and Thresher) there will be only one combined record for boat and shore caught fish, and the fish must be measured and released without removing it from the water. For boat caught fish the length of the fish can be determined by drawing it alongside a measure on the side of the boat or by marking the position of the snout and tip of the tail on the side of the boat and then measuring the shortest distance between the two marks. This whole measuring process must be filmed. In respect of these species, claims will not be accepted for the fish that are:
  - Bought onboard a boat. B) Landed on the shore or C). Where it is clear that the fish was significantly harmed during the measuring process.
- Other than for Ray and Skate species, the measurement taken should be from the tip of the snout or mouth, to the tip of the tail. For Ray and Skate species the measurement should be taken from wing tip to wing tip. For Skate, the length of the fish must also be measured and shown in the video evidence.
- The length or width recorded will be rounded down to the nearest whole single centimeter. For species that have to be measured in the water, the length will be rounded down to the nearest multiple of 10cm.
- If there is a witness to the measurement they will need to provide written confirmation of the length recorded on a standard form provided by the BRFC.
- If there is no witness to the measuring the captor will be required to complete an affidavit using a draft affidavit provided by the BRFC confirming the length recorded, in addition to providing clear firm evidence of the entire measuring process.
- To aid species identification, the distinguishing features of the fish should be filmed or photographed, typically including coloration, mouth, eyes, head, fins, relative position of the fins, lateral line etc.
- It is the captor's responsibility to ensure that they obtain sufficient film evidence of the measurement of the length and/or width of the fish.

# CONSTITUTION

- 1 TITLE.** The club is entitled the 'RNRMAA Veterans Sea Angling Club', (hereafter called 'the club').
- 2 OBJECTIVES.** The objectives of the club are:
  - a. Fundamentally we are a specimen fish and most species sea angling club offering annual individual and team competitions for retired RN and RM service personnel.
  - b. We select and manage representative teams to participate in events against other clubs and organisations.
  - c. We are an affiliated club of the national governing body of our sport.
  - d. The club will be run as a not for profit organisation for the benefit of its members. All surplus funds created by the club will be used to improve or enhance the clubs sporting activities.
- 3 ORGANISATION.**
  - a. The National Administrator (NA) duty it is to manage the day to day business of the club. The NA will be assisted by a Committee of regional Secretaries elected at the AGM, who may from time to time make rules or bye-laws for the conduct of the clubs business. The bye-laws control the following matters but are not restricted by them:
    - b. Appointing a Club Welfare Office (CWO) to oversee safeguarding matters on behalf of the club.
    - c. To elect a 'competent person' for testing members scales against our calibrated trading standard test weight set.
    - d. Setting entrance fees, and other fees or payments to be made by members, and to members by the club, and its sponsors.
    - e. The keeping and authentication of club and competition rules and records.
    - f. Seeking sponsorship for the clubs annual competitions and other promoted events.
    - g. Administering the conduct of members in relation to one another directly or indirectly by any means, including the rights and privileges of all members, and the admission and dismissal of members.
    - h. The Committee shall meet online as and when necessary for matters of policy. A majority decision in all cases is mandatory and the NA is entitled to the casting vote. If considered necessary, the NA may call additional meetings when all voting members will be invited to attend, and the normal rules regarding quorums shall apply. Minor matters may be dealt with by the NA.
    - i. Annual General Meeting. This will normally be held online each November, to decide the clubs policy and objectives. The AGM date will be announced to all members.
- 4 MEMBERSHIP.**
  - a. Membership is open to all retired RN and RM service personnel who are actively sea fishing. A single one off payment of £25 to cover admin fees is required. Service details are required to ensure membership entitlement. The club have no restrictions or limitations based on race, colour or creed, nor does it have any local, national, or international political affiliations.
  - b. The clubs primary form of communication with its members is electronic through our WhatsApp and Facebook groups. Telephone, text, e-mail are used as secondary means of contact. To this end, the club asks for members contact details at the time of joining via a Membership Form. It is the members responsibility to advise the NA of any changes to personal contact details as soon as they have been amended.
  - c. Members are to make themselves aware of our 'Code of Conduct'.
  - d. Members will be placed into Regional Leagues (Northern or Southern) based on their permanent place of residence with a boundary drawn through the city of Birmingham. Should a member permanently move during a season, he or she will compete within the new region from the date of moving in. Individual species totals he or she registered will be transferred to the new region. It does not matter where a fish is caught, it will count for the member no matter what Regional League that member is register in.
  - e. Members must obey any venue, bait, fish, or angling regulation placed upon recreational sea anglers as directed by the MMO, DEFRA, IFCA, the Angling Trust, or any other organisation so governing our sport.
  - f. Winners of annual challenge trophies will give a satisfactory quarantine to the Committee as to its safe custody, and return it when requested to do so.
  - g. A member may resign from the club at anytime. The NA and Committee shall have the power to suspend or expel any member from the club for breaching any rule, or for bringing the club into disrepute, including posting sexist, racist or derogatory comments on our forums. Their membership fee or other subscriptions will be forfeited. Dismissed members shall have the right to appeal to the Committee with regard to any decision affecting themselves, provided that a 'notice of appeal' is submitted to the NA in writing within 14 days of the notification date of the Committees decision.
  - h. The club accepts no responsibility whatsoever for any loss or damage of any kind, including personal injury or loss of life suffered by any member, or their guests, or the property incurred while a member is taking part in any of our competitions or other activity held under the auspices of the club, or incurred in the furtherance of the business of the club. It is a condition of membership that neither the member nor their representative shall make any claim against the club for such loss or damage.
  - i. While the club will seek to ensure the health and safety of its members, it must be recognised that health and safety is the responsibility of each and every individual member associated with the club.
- 5 ACCOUNTS.**
  - a. Audited accounts drawn up to the rules applicable to non-public funds shall be rendered annually.
  - b. In the event of the club being wound up, all residual funds belonging to the club will be donated to the RNAA.
- 6 PRIVACY POLICY.**
  - a. The club is committed to protecting and respecting members privacy. Our lawful basis for processing members personal data is that we have an obligation to you, to provide you with the service you are paying for. This includes sharing data with Committee officials, sponsors, trade accounts (but only if you use them). We will hold your personal data on file as long as you are a member, or as long as any legal requirement demands. Our online forums provide their own privacy policy and we do not accept any responsibility or liability for their policies.

# MATCH RULES

- a. All members of the club are to abide by the Match Rules, and the rules for the various competitions hosted by the club.
- b. All of our competitions run from the 1st January until the 31st December annually.
- c. Our events are saltwater species only, we cannot accept freshwater fish that can be caught in sea water. This is because it is very hard to prove where they were caught. This includes but is not limited to: Brown/Sea Trout, Stickleback's and Carp.
- d. Fish caught at sea will be eligible if the boat used set out from, and returned to a port in England, Scotland, Northern Ireland, Wales, the Channel Islands, the Isle of Man, or any part of the United Kingdom without having called in at any port outside of those countries. Fish caught in the territorial waters of other countries will not be eligible. Shore fishing means from any land mass or fixed man-made structure. In case of doubt, the NA will classify a claim on the information provided.
- e. Fish must be caught by rod and line and hooked and played by one person only. As to tackle, no more than two rods with three single hooks, or two pannel mounted baits between the two rods may be used from the boat and shore. Only one pannel mounted bait is allowed on each rod so constructed that the measurement between the eyes of the two hooks do not exceed 20cm for boat angling, and 10cm for shore angling, with a third single hook attachment. Treble hooks count as three hooks.
- f. No other person may touch a members rod, reel or line after his fish is hooked, or give any assistance to a member which would be to the detriment of the fish, except that another person may gaff or net fish when it is brought within range. Boat crews may unhook fish. Trot (long lines), hand lines, casting otherwise than with a rod, or other methods of fishing are forbidden. The deliberate foul hooking of fish is not allowed, however accidental foul hooked fish are allowed at the discretion of the NA. In the event of a fish being hooked by two or more members, caught on lost traces, bitten off or in half on the retrieve, shall not be eligible for recording.
- g. There are no minimum sizes unless specifically directed by the Committee. Members are requested to keep fish alive when bringing them to the scales as all of our competitions are 'Catch and Release'. It is the individual members responsibility to ensure that fish are returned alive to the water from which they were taken.
- h. All fish must be returned to the water before an angler can carry on fishing. Large fish (Conger, Sharks, Skate, Tuna etc) deemed unsafe to bring onboard, may be released at the side of the boat where a photograph with the captor can be taken. Fish will be deemed to have been caught if the trace is touched and witnessed by an adjacent angler.
- i. When charter boat fishing, members are allowed to make up two rods provided that only one rod is in the water at any one time. When booking club boat trips, members must be prepared to pay the full amount of any trip that they have committed themselves too, and then have to cancel for whatever reason. Private boat anglers are allowed to fish with two rods at the same time but no more than three hooks between both rods are allowed.
- j. All anglers casting from a boat must keep the lead on the outside of the boat. All anglers must shout 'CASTING' to ensure all other anglers are aware. All anglers must make every effort to allow a fellow competitor to cast safely, this includes lowering and/or moving their rod to allow sufficient space. Spare rods must be stowed out of the way on boats so as not to inhibit other anglers. Tackle boxes should be placed in such a position as to allow easy access around the boat.
- k. Anglers wishing to use 'power casting' styles when shore fishing must use a minimum of 50lb breaking strain shock leader. It is recommended that the breaking strain of shock leaders should be a minimum of 10 pounds per ounce of the weight being used. In the interest of safety, members are advised that any form of dangerous casting is prohibited. Another angler may cast for a member who is deemed incapable of casting due to physical disability provided that such an arrangement has been requested from the NA and agreed prior to the commencement of an angling trip.
- l. When fishing from a pier, members are to observe the Pier Authority's rules. Assistance to land a fish from a pier with a drop net is permitted, as is hand-lining a fish up the pier or promenade wall.
- m. Any legal fresh or artificial bait or lure is allowed. Members are allowed to have any number of fully made up traces.
- n. Once you have caught a fish as noted against the British Record Fish Lists, including Mini-Species, take a SELFIE photograph of yourself holding the fish and then return it to the water. If you are fishing alone you can place the fish next to your individually named laminated 'Most Species Card' and snap a picture, and then return it to the water. Match Cards used in civilian open or closed competitions are acceptable if witnessed and signed by the match official.
- o. You will need to submit your fish picture to the NA within 36 hours of capture via our members main WhatsApp or Facebook Groups for it to count in all of our promoted competitions. Please state the name of the species being registered, the date and location of capture, port of departure if caught from a boat. Multiple captures of species on any one day/outing are acceptable but please ensure a photograph is submitted for every species caught.
- p. For Specimen, Record, Personal Best and Club Champion claims a SELFIE photograph is required with an image of the fish on a set of scales clearly showing the weight of the fish being registered. Whenever possible please also start taking photographs of the fish on a measuring stick.
- q. Detailed rules for submitting British Record claims by weight and length are available on the Angling Trust website. These can change on a regular basis, so ensure you read these thoroughly before returning your fish to the water. Contact details for the BRFC Secretary are published on their website.
- r. By submitting a species claim members agree that they understand and are complying with our rules. Any breach of the rules during the competition year will result in a claim, or member being disqualified.
- s. Fish ID queries may be posted on the forums for clarification. We recommend that you take as many photographs of your fish from different angles including close ups of the fins, head, gills, and teeth. Raising the dorsal fins will help us ID the fish. If a detailed photograph is not enough to identify any species, the claim will be dismissed. Blurred images of any fish and/or Most Species Card will see a claim rejected.
- t. Members should get all scales they hold tested against the clubs 'Test Weights' for which a Certificate of Calibration will be issued by the NA.

# COMPETITION RULES

## INDIVIDUAL LEAGUES

- a. All members will be placed into Boat and Shore Most Species Leagues based on their permanent place of residence. These Regional Leagues will be run from the 1st January to 31st December annually.
- b. Members may catch and register as many different species of fish as noted against the BRFC sea fish list during the year. Only one fish of each species will count. The member who submits the greatest number of different species in each section will be declared that Region's winner. If the number of main species are equal between two or more members, the total number of specimen fish caught will define overall positions.
- c. Members must post all claims within 36 hours of capture on our main WhatsApp Group stating the name of the species caught, date of capture, beach or location from the shore, port of departure from the boat. Multiple claims on any one day/outing is acceptable.
- d. A photograph is required for all fish claims, and a SELFIE picture of the fish on a set of scales showing its weight IS a requirement when submitting Specimen, Record, PB and Club Champions League fish claims. If you are fishing alone you can place your fish next to your individually named 'Most Species Card' and take a picture, then post it on our WhatsApp Group. If the species of the fish is unknown, members are to post the photo and the Committee will confirm its identification.

## CLUB CHAMPIONS LEAGUE

- a. Members are required to submit 5 different main and 1 mini-specie SELFIE photographed and weighed fish during the year to be accepted into the Club Champions League competition. Those species are given points based on their percentage weight against the British Record Sea Fish Lists. The member with the most BR percentage points is the winner.
- b. A SELFIE photograph of the captor and the fish must be submitted with each claim, together with a photograph of the captor's fish displaying its weight on a certified set of scales for it to count.
- c. The 5 main species of fish must be different. All can be boat or shore caught, or a mixture of both. Those species and weights can be improved and changed by members at any stage during the year. The 1 mini-specie can be boat or shore caught and can be improved and changed at any stage during the year.

## NATIONAL MINI-SPECIES LEAGUE

- a. A National Mini-Species League will open from 2026 whereby members can register as many different boat or shore caught fish into the competition. The member registering the most mini-species will be the winner. Should the number of mini-species claims be equal between two or more members, (BR%) points based on weighed fish will decide overall positions.

## NATIONAL SPECIMEN FISH LEAGUES

- a. National Specimen Fish Leagues will open in 2026. This will be split into two sections Boat and Shore. Individual members submitting specimen fish claims will automatically feature in each league and the member registering the most number of claims in each section will be the winner. Should the total number of specimen fish be equal between two or more members, specimen fish percentage points will define overall positions.
- b. The specimen 'Fish of the Month' will be defined by the fish that gains the most percentage points nationally.

## CORONATION CUP

- a. The Coronation Cup is an Inter-Club competition fished annually between all members of the RNRMAA Veterans SAC, and all paid-up serving members of the RNAA Sea Section. Members of both clubs may register 1 Boat and 1 Shore species from the main BRFC Sea Fish List, and 1 Boat or Shore caught Mini-Species for points.
- b. 1 point will be awarded for each claim, 2 points for a New Club Record, 3 points for a Specimen Fish, 4 points for a New British Record. The highest points scoring fish will count for each club and override any previous claim. If end of season points are equal between both clubs, the most number of different species will decide overall positions.
- c. Only SELFIE photographed claims of the captor holding/pictured with their fish will be accepted into this competition, with species claims granted to the first named captor posting images on their club's WhatsApp Group. Weighed fish will replace all unweighed accepted claims.

# RISK ASSESSMENT and SAFETY POLICY

RNRMAA Veteran SAC members are resident all over the UK thus making detailed assessments of every fishing location is impossible and impracticable, however this document provides good safety principles which if applied will reduce the likelihood of accidents happening to members. This Risk Assessment and Safety Policy will be reviewed annually.

## GENERAL

- 1 Fishing is an extremely varied and dynamic activity in which participants experience varying conditions and changing environments on an almost continuous basis. We are all aware that a night of wind and rain can instantly change a venue creating new risks that weren't present the day before. Anglers must continue to evaluate those changing conditions and decide whether or not it is safe to start, or continue fishing.
- 2 Members must accept that by engaging in active boat angling their physical safety may be endangered either as a skipper, crew, or otherwise, they do so solely at their own risk and must recognize the actual and potential risks associated with their boat trip including drowning, hypothermia, falling overboard, impact wounds from hooks, knives and weights, as well as being bitten or injured by fish. Extreme caution should be exercised at all times when fishing from a boat.
- 3 Prior to fishing, make sure you are fit and well, able to participate and properly hydrated. Ensure all your fishing equipment is checked and safe, e.g. line, knots, rigs etc. If fishing at night ensure you carry a suitable headlight, and a spare. Take adequate food, clothing and if fishing alone, tell someone where you are going and what time you expect to return. It is recommended that you always carry a mobile phone, in case of emergencies, and also carry a whistle to attract attention.
- 4 Any member who has a known medical condition, MUST make themselves known to the event organizer. If you are feeling unwell prior to a fishing trip then you should consider not fishing, as you may put yourself and other anglers at risk. For fit/able bodied anglers, if you have a long walk to a venue, consider the type and amount of tackle you can safely carry.
- 5 Always check weather and tide conditions. If conditions deteriorate beyond safe limits, fishing should be abandoned. During hot conditions ensure you have suitable protection from the sun, e.g. high factor sunscreen used liberally in bright sun, a hat, and a plentiful supply of drinking water.
- 6 **Litter.** Members must ensure that their fishing area is clear of litter, bait and tackle, even if it does not belong to themselves before leaving a venue, or boat.
- 7 Our club encourages all members to be familiar with basic first aid, and to carry a first aid kit, including a suitable mask, gloves and sanitiser. Hand gel will ensure that anglers go home with clean hands and minimize the risk of contracting a bacterial infection. Thoroughly clean your hands before eating is recommended. All injuries other than minor cuts and abrasions will be recorded. If the circumstances of an accident are not clear, notes of the accident will be made. If there are doubts about the nature or seriousness of an injury, the responsible person will ensure that the injured person is given appropriate medical attention as soon as possible.
- 8 If you fall into the water stay calm and try to float on your back as you make your way to safety. Take deep breaths and conserve energy. If you can stand, do so carefully and make your way out. On leaving the water seek help and get warm and dry as soon as possible, consume a hot drink. Never enter the water to rescue another person, call for help, dial 999 and make use of any lifesaving equipment located around you.
- 9 Refer to the clubs 'Code of Conduct' regarding fish welfare guidelines.

## SHORE FISHING

- 1 **Casting.** To avoid line breakage make sure a shock leader is used at all times. At least 10lb breaking strain for each ounce used. Members using more powerful rods and casting techniques should consider using heavier shock leaders. The leader must be of a suitable length, at least 6 turns on the reel, and extended to include the rig.
- 2 Always check before casting to ensure the area is clear of other anglers, and members of the public whether on shore, swimming, or aboard water craft. If in doubt do not cast, wait until the area is clear and safe before casting.
- 3 Anglers fishing alone should inform a trusted third party as to the venue where they intend to fish and their expected time of return.

## SHORE VENUES

- 1 **Beaches.** Be aware of steep shelving beaches, ground swell and rogue waves. Keep yourself and equipment well back from the last tide mark and stay aware of sea conditions, especially at night. Do not light open fires when fishing.
- 2 **Cliffs.** Be aware of falling rocks, landslides, mudslides etc. Do not stand directly under cliffs and check tides and conditions so that you are not forced into that position. Consider head protection, ropes etc when scaling steep slopes. Ensure that there is no chance of being cut off by the tide, weather conditions may cause higher than expected levels of water. Restrictions on access must always be obeyed and all warning signs duly noted. Only use designated footpaths to access any beach, or other venue.
- 3 **Rocks.** Are especially dangerous with the risk of injury due to falls and drowning. Wear sturdy footwear, beware of slippery rocks, obstructions and rogue waves. Use of buoyancy aids are highly recommended, and do not fish alone.
- 4 **Pier, Promenades and Breakwaters.** Risk of drowning, slippery surfaces and rogue waves. Buoyancy aids are advisable.
- 5 **Estuaries.** Beware of becoming stuck in the mud, especially if bait digging.

## SHORE COMPETITIONS

- 1 If in doubt due to weather conditions always check with the Match Steward that the competition is going ahead.
- 2 Any angler arriving late/leaving early must inform the Match Steward before fishing/departing. If any entrant is unaccounted for and cannot be contacted, the emergency service should be informed.
- 3 Anglers should be aware of free-running pets who may tangle themselves on pre-baited rigs. Try to keep spare rigs within the confines of your base camp. Be aware of anyone near you and respectfully advise them of the risk.
- 4 **Rovers.** Members must choose their venue carefully, taking into account sea/weather conditions and assess the safety of your chosen venue before fishing. Any member not returning to the weigh-in location should inform another competitor or Match Steward before leaving the event.

## BOAT FISHING

- 1 All members should be fully competent in handling waterborne craft and have the appropriate insurance cover.
- 2 Boats should be in a seaworthy condition with a general safety check being made before leaving the harbour.
- 3 All boats should carry the appropriate safety equipment and it must be in a serviceable condition. It is recommended that boat users carry VHF equipment. Wear a life jacket or suspender. Store fishing equipment sensibly, ideally in the center of the boat so as to avoid trip hazards.
- 4 Spare fuel and engine parts should be carried and any auxiliary engines be checked regularly.
- 5 Remember boats can be unstable when their balance is disturbed. Take particular care when getting on, off, or moving around any vessel on the water.

# PHOTOGRAPHY - IMPROVE YOUR FISH IMAGES

Smartphones are amazing tools. Although you can't expect to get the same image quality as you get with a DSLR and loads of equipment and lenses, mobile phones fit in our pockets and we almost always have one on us. Read this guide to fishing photography to learn how to get great outdoor photos with your smartphone. Remember to use these techniques to improve your catch rate. There are three elements of photography that you should always keep in mind when shooting outdoor photography with a mobile device. These are:

1. Light.
2. Subject.
3. Composition.

**LIGHTING** - At the end of the day, photography is all about capturing light (exposure). That means it's really important to use light to your advantage for great outdoor photography.

**LIGHT DIRECTION** - Whenever possible, try to have the sun at your back when taking a photo. For a SELFIE, you'll want the sun to your front for the same effect. Typically at mid-day, this won't make that much difference, but taking a photo towards the sun in the morning or late afternoon will not record a whole lot of detail other than a silhouette. In low light conditions, like around sunrise and sunset, having the sunlight on the wrong side of you can work out OK if you're using your flash, but in bright light, the flash just isn't powerful enough.

**NIGHT PHOTOGRAPHY - WHEN TO USE A FLASH** - At night, you're going to need some sort of light source, and again, you want to avoid shooting with the light behind the subject. When you're outdoors and there is little light around, use the flash on your smartphone. You can keep your mobile phone set to auto flash mode, and the flash will automatically be used when it's dark out. Another simple trick is to use the 'always on' mode. Push the lamp symbol in your camera's setting to access this mode. In this setting, the flash turns on and stays on, giving you light to help compose the image and help the camera focus.

**THE SUBJECT - POSING WITH YOUR CATCH** - If you don't plan to release your fish, make sure to take photos while it's still alive. This simply makes for a much better-looking photograph. For a really great photo, look at the camera, or look at the fish while being photographed. Grip your catch with both hands supporting the fish's head and tail, with the fish held horizontally (landscape). Holding the fish out away from your body and close to the camera is a classic old fisherman's trick to make your catch look bigger to the viewer. This angle works by making the fish look larger in proportion to your body behind it. This technique works great, but don't overdo it. It's easy to see when you go too far because your fingers will look way out of proportion with the rest of your body!

**COMPOSITION - COMPOSING BETTER PHOTOS - PORTRAIT OR LANDSCAPE** - For looking at images on your mobile phone, a portrait photo is definitely easier. Looking at landscape shots requires you to have your phone set to auto-rotate, and then to physically tilt the phone, which isn't that bad, but can get a little annoying. For looking at images on laptops, or when making actual hardcopy prints for your home or office, landscape is the winner.

**FISHING PHOTOGRAPHY SAFETY** - Stay aware while taking photos! The sea demands your attention and respect at all times, so make sure you're not drifting towards trouble, and never turn your back to the sea on an exposed rocky shore. Remember, it only takes a moment for things to go wrong out in the field. Smartphones are expensive and often fragile gadgets. To make matters worse, not all of them are fully waterproof, and most importantly, they sink. Be careful to keep your phone over dry land when photographing, and avoid holding it out over the edge of a boat. Many smartphones have been lost this way. Dropping a smartphone on a hard surface can easily cause the screen to crack or shatter, so think about getting your phone a protective cover, especially when taking it out into the elements.

## FIVE PRO FISHING PHOTOGRAPHY TIPS

1. **Be Cool.** Take a deep breath and stay calm during all the action. It can be tough when you're in a hurry to release a fish but a shaking hand can cause a blurry photo.
2. **Get Creative.** Photography is a science and an art, but try not to get too bogged down in the technical stuff. Don't be afraid to be creative and try different angles. Have fun!
3. **Keep a Clean Lens.** When you take your smartphone out of your pocket to take a photo, always check to see if the lens is clean. There's a huge difference between a photo taken with a clean lens and one covered in dust or grease. Use a soft dry cloth to clean your lens and never your fingertips.
4. **Record.** Try to record as much info in your fishing photography to help you learn from your successes (and failures).
5. **Use Grid Lines.** Your smartphone has a 'grid' mode with 2 horizontal, and 2 vertical lines across the screen. Use this grid to compose your pictures using the rule of thirds. The grid can also be really helpful for the photographer, especially when out fishing from a kayak, or when you're out on the sea and there's some swell around. The grid will help you keep the phone level with the horizon.

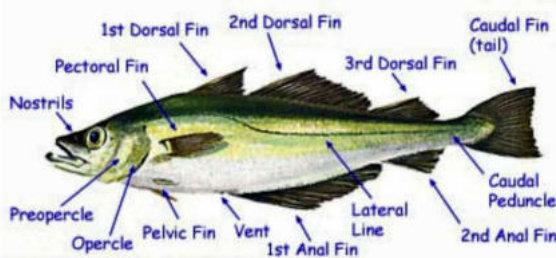

## RETENTION SIZES (MCRS)

Historically, UK anglers have been required to adhere to legally enforceable minimum sizes for a variety of fin-fish. Those sizes have become known as Minimum Conservation Reference Sizes (MCRS). The legal basis for the MCRS used to include EU legislation but now that the UK has left the EU, the legal basis has become a combination of UK national legislation, (statutory instruments), and local legislation such as (bye-laws) introduced by Inshore Fisheries and Conservation Authorities (IFCAs). Some species are subject to total protection including, not targeting them. Unfortunately not all IFCAs have adopted the same MCRS for particular species and some do not even have MCRSs for all species that some other IFCAs have included. The Angling Trust appreciate that a good proportion of recreational sea anglers may well have little inclination to research the websites of IFCAs to find what legal MCRSs apply in the area in which they fish and instead, they rely on various sources such as lists of voluntary minimum sizes published by their clubs. The AT has investigated the websites of all IFCAs and collated all the MCRS published on them. From that data they have selected the highest MCRS found for each species. By referring to that column in the chart below an angler fishing in any IFCAs area can be reasonably assured that should they choose to retain a fish, then they would not be committing an illegal act by retaining it. The situation with IFCAs regarding MCRSs is currently somewhat fluid with some IFCAs reviews underway so this list is for initial guidance only. In the event of any dispute, the bye-laws in force for the particular IFCAs in whose area the fish was caught takes precedence. The AT believes that many anglers whilst enjoying their sport and occasionally retaining fish for consumption, are keen to adopt a conservation minded approach as well as supporting campaigns aimed at ensuring commercial exploitation of stocks is also done at a sustainable level. To that end the AT believes in allowing all species of fish the chance to have spawned at least once before being taken. On that basis, they have reviewed available scientific data regarding maturity sizes and have selected the point at which 50% of the population of a particular species is reported to be mature and hence capable of having bred at least once. The AT have added those sizes in the column headed 'Maturity' below. In addition the AT recognizes that stocks of some species are at a level where they feel it reasonable to suggest that those species are not retained (in instances where safe release is achievable) but with catch and release remaining acceptable.

IFCS/MCRS			IFCS/MCRS			IFCS/MCRS		
SPECIES	LEGAL	MATURITY	SPECIES	LEGAL	MATURITY	SPECIES	LEGAL	MATURITY
Anglerfish	None	70cm	Hake	30cm	43cm	Ray (Stingray)	45cm	63cm

Haddock	30cm	40cm	Ray (Spotted)	45cm	55cm	Wrasse (Rock Cook)	12cm	14cm
SPECIES	LEGAL	MATURITY	SPECIES	LEGAL	MATURITY	SPECIES	LEGAL	MATURITY
IFCS/MCRS			IFCS/MCRS			IFCS/MCRS		

- 1 The size of sexual maturity for species from the Gadidae family including Coalfish, Cod, Haddock, Pollack, and Whiting can vary widely depending on a number of factors. The figures quoted represent the size at which 50% of fish of these species have reached sexual maturity.
- 2 An Environment Agency bye-law prevent anglers from retaining the European Eel (*Anguilla anguilla* - Silver Eel). However, they can be retained for weighing or measuring but must be returned alive to the water they were taken from on completion of fishing.
- 3 Undulate Rays in our waters are classified as near threatened (IUCN). The AT suggest that all fish are returned alive.
- 4 Shad are protected under the Wildlife and Countryside Act and all fish must be returned.
- 5 Monkfish are listed under the Wildlife and Countryside Act and will be protected against killing, injuring or taking (section 9(1) on land and up to 3 nautical miles from English coastal baselines. These are not to be confused with the unprotected Angler Fish (*Lophius piscatorius*) whose tails are marketed as Monkfish.
- 6 We recommend that all large Sharks are released unharmed at the side of the boat rather than brought on board.
- 7 Spurdog are classified as critically endangered in the Northeast Atlantic and we suggest that all fish are returned alive.
- 8 Anglers should be aware that there is a national restriction on landing Tope caught from a boat, which includes kayaks by rod and line. Any boat caught Tope are legally required to be released as soon as possible after capture.
- 9 Atlantic Bluefin Tuna may only be directly targeted by recreational anglers taking part in a licensed recreational catch and release fishery applicable to the home nation in whose waters they are fishing. Therefore, recreational sea anglers who are not part of such programs are obliged to do everything they can to ensure any by-catch is returned to the sea alive.
- 10 IFCAs define the MCRS for most skate/ray species by way of the measurement between wing tips for whole fish or wing base to wing tip for detached wings. All AT sizes refer to the overall length (nose to tail).

The Maturity sizes shown here have been formulated from the best available evidence at the time. If you have more information and can provide referenced studies to update this information then the Angling Trust would love to hear from you. Please e-mail them at [admin@anglingtrust.net](mailto:admin@anglingtrust.net)

## BEAUFORT WIND FORCE SCALE

The Beaufort Scale is an empirical measure that relates wind speed to observed conditions at sea or on land. Its full name is the Beaufort Wind Force Scale. Below is a table showing the Beaufort scale with speeds in knots, miles per hour and kilometres per hour. Please note that these are mean speeds, usually averaged over 10 minutes by convention, and do not capture the speed of wind gusts. The wind speeds shown in the table below, and that you hear quoted in weather or news reports are always measured at 10 metres above the ground using meteorological instruments. They do not reflect the wind speeds that you would feel on the ground. At 2 metres, wind speed may be only 50-70% of these figures. The specifications are descriptions of likely observations on land or at sea, and the probable and maximum wave heights (in metres) are quoted for the open sea. The figure for sea state (on a scale from 0-9) is a shorthand way of describing the sea surface conditions to various users.

WIND FORCE	DESCRIPTION	WIND SPEED			SPECIFICATION	PROBABLE WAVE HEIGHT		SEA STATE
		km/h	mph	knots		Metres	Max	
0	Calm	<1	<1	<1	Smoke rises vertically. Sea like a mirror.	--	--	0
1	Light Air	1-5	1-3	1-3	Direction shown by smoke drift but not by wind vanes. Sea ripples without crest.	0.1	0.1	1
2	Light Breeze	6-11	4-7	4-6	Wind felt on face; leaves rustle; wind vane moved by wind. Small wavelets. Crests of glassy appearance not breaking.	0.2	0.3	2
3	Gentle Breeze	12-19	8-12	7-10	Leaves and small twigs in constant motion; light flags extended. Large wavelets. Crests begin to break. Scattered white caps.	0-6	1	3
4	Moderate Breeze	20-28	13-18	11-16	Raise dust and loose paper; small branches moved. Small waves with breaking crest. Fairly frequent white caps.	1.0	1.5	3-4
5	Fresh Breeze	29-38	19-24	17-21	Small trees in leaf begin to sway; Moderate waves of some length. Many white caps. Small amount of spray.	2.0	2.5	4
6	Strong Breeze	39-49	25-31	22-27	Large branches in motion; whistling heard in telegraph wires; umbrellas used with difficulty. Long waves begin to form. White foam crest are very frequent. Some airborne spray is present.	3.0	4	5
7	Near Gale	50-61	32-38	28-33	Whole trees in motion; inconvenience felt when walking against the wind. Sea heaps up. Some foam from breaking waves is blown into streaks along wind direction. Moderate amounts of airborne spray.	4.0	5.5	5-6
8	Gale	62-74	39-46	34-40	Twigs break off trees, generally impedes progress. Moderately high waves breaking crests forming spindrift. Well marked streaks of foam are blown along wind direction. Considerable airborne spray.	5.5	7.5	6-7
9	Strong Gale	75-88	47-54	41-47	Slight structural damage (chimney pots and slates removed). High waves whose crests sometimes roll over. Dense foam is blown along wind direction. Large amounts of airborne spray may begin to reduce visibility.	7.0	10.0	7
10	Storm	89-102	55-63	48-55	Seldom experienced inland; trees uprooted; considerable structural damage. Very high waves with overhanging crests. Large patches of foam from wave crests give the sea a white appearance. Considerable tumbling of waves with heavy impact. Large amounts of airborne spray reduce visibility.	9.0	12.5	8
11	Violent Storm	103-117	64-72	56-63	Very rarely experienced, accompanied by widespread damage. Medium-sized ships lost to view behind waves. Exceptionally high waves. Very large patches of foam driven before the wind cover much of the sea surface. Very large amounts of airborne spray severely reduce visibility.	11.5	16.0	8
12	Hurricane	118	73	64	Devastation. Air filled with foam and spray, very poor visibility. Huge waves. Sea is completely white with foam and spray. Air is filled with driving spray greatly reducing visibility.	14	--	9

### WEATHER WARNING KEY

RED	AMBER	YELLOW
Extreme weather is expected. Red means you should take action now to keep yourself and others safe from the impact of the weather. Widespread damage, travel and power disruption and risk to life is likely. You must avoid dangerous areas and follow the advice of the emergency services and local authorities.	There is an increased likelihood of bad weather affecting you, which could potentially disrupt your plans and possibly cause travel delays, road and rail closures, interruption to power and the potential risk to life and property. Amber means you need to be prepared to change your plans and protect you, your family and community from the impacts of the severe weather based on the forecast from the Met Office.	Severe weather is possible over the next few days and could affect you. Yellow means that you should plan ahead thinking about possible travel delays, or the disruption of your day to day activities. The Met Office is monitoring the developing weather situation and Yellow means keep an eye on the latest forecast and be aware that the weather may change or worsen, leading to disruption of your plans in the next few days.

**RNRMAA VETERANS SAC**  
**LIFE MEMBERSHIP**  
**APPLICATION FORM**  
*(Retired RN and RM Personnel)*

**PLEASE COMPLETE THIS FORM IN BLOCK CAPITALS**

Surname >

**DATA PROTECTION AND PRIVACY POLICY.** The RNRMAA Veterans Sea Angling Club is committed to protecting and respecting your data and privacy. Our lawful basis for processing your personal data is that we have an obligation to you as a member to provide the services you are signing up for. The reasons why we need to process your data include: sharing with officials to administer our competitions and meet-up events. Provide information to other organisations for the purpose of entry into events (but only if you enter). Provide information to companies offering trade accounts/discounts (but only if you use them). Sharing data with Committee members about other activities, or invitations to events. We hold your personal data in a file or online folder for as long as you are a member, or as long as any legal requirement demands. The club have Facebook and WhatsApp social media groups, and if you join these groups please note that they provide their own privacy policy and that we do not accept any responsibility or liability for their policies.

# MY SPECIES – 2026
